Eudesm-7(11)-en-4-ol (t)	0.02
Valencene (t)	0.59
Sum of Terpenes	32.86

Method is validated for all components except components marked with (t). Components marked with (t) have been tentatively identified with GC-MS. Actual identity and concentration of components marked with (t) might be different than reported value. No reference standards are commercially available for tentatively identified components.

Maximum CBD Wt% is calculated assuming all CBDA is completely converted upon heating.

Maximum THC Wt% is calculated assuming all THCA is completely converted upon heating.

Herbal Cannabis Samples have been known to show considerable intra- and inter-plant variability. The test results presented above are primarily representative only of the material directly analyzed and subsequent samples collected from the same lot might not provide identical results. The Werc Shop, Inc. uses high performance liquid chromatographic techniques.

Cannabaceuticals™, Moving Sustainable Medicines Forward™, Werc™, the W Logo, Ery™ and the "CC" are trademarks of The Werc Shop, Inc.

This CoA is intended for use only by a valid CA Proposition 215 Patient or Organization for California medical purposes.
